Search engine optimization (SEO) is the process of optimizing your website for search engines like Google and Bing. When your website is well-optimized for SEO, it will be more likely to appear in the top results of search engine results pages (SERPs), which will lead to more traffic and leads for your business.

There are many different factors that affect your website's SEO ranking, but some of the most important include:

- Your website's content
- Your website's structure
- Your website's backlinks
- Your website's user experience

In this SEO training course, we will focus on the most common SEO issues that businesses encounter, and we will provide you with the tools and

techniques you need to fix these issues and improve your website's ranking.
